

We are seeking an exceptional individual to fulfil the following role:

Workshop/Warehouse Supervisor

Skipton

Do you work in an organised and structured manner? Have you got an eye for detail? Are you resourceful and like problem solving?

As a Disaster Recovery business we assist our commercial clients by working closely with them, to ensure their business is back up and running in the shortest possible time frame following fire damage or water damage such as flooding to their property. Our primary focus is to attend to the material damage requirements, such as the premises, contents, stock and machinery on which we carry out specialist decontamination and restoration processes.

To ensure our site teams are well equipped to carry out the work, we need to appoint an organised and effective Workshop/Warehouse Supervisor.

You will ensure that the stores holds the right amount of materials, goods and products in the right location to feed the business's operational and customer demand; verifying stock and identifying losses; ensuring equipment is repaired in a timely manner; and maintaining an organised warehouse layout.

In addition, contents which are moved into the workshop for processing will need to be stored in the correct conditions, inventories checked to confirm receipt and goods quality controlled and signed off throughout the restoration process.

You will be responsible for any staff deployed to work in the workshop/warehouse.

Previous experience in warehouse/stock control/M & E maintenance and using a scanning system would be a distinct advantage.

As a national 24 hour operating business, some flexibility is needed, as is travel to sites.

This is a full-time position where a full Driving Licence is essential.

If you think you have the aptitude, attitude and like to be challenged, then we would love to hear from you.

To apply, please send a copy of your CV and a covering letter detailing which role you would like to apply for to restoration.recruitment@uk.issworld.com.
